github.com/Yuvrajpk | https://yuvrajpk.github.io/Portfolio/

SUMMARY

Experienced DevOps Engineer with expertise in automating infrastructure, optimizing CI/CD pipelines, and fostering seamless collaboration between development and operations. Proficient in AWS, containerization (Docker, Kubernetes), and infrastructure-as-code (Terraform, Ansible and Cloud Formation).

Skilled Cloud Engineer with expertise in designing, deploying, and managing scalable and secure cloud infrastructure on AWS. Proficient in a wide range of AWS services (EC2, S3, Lambda, RDS). Adept at enhancing cloud scalability, security, and cost-efficiency while driving continuous improvements in software delivery processes.

SKILLS

Cloud Platform: Amazon Web Services.
Elastic Compute Cloud (EC2), Lambda, Route 53
Virtual Private cloud (VPC), CloudFront
CloudTrail, CloudWatch, CloudFormation,
AWS Auto Scaling
Simple Storage Service(S3)
Amazon Rekognition
Identity and Access Management (IAM)
Elastic Kubernetes Service (EKS)

Database: Relational Database Service (RDS) and DynamoDB

DevOps: Jenkins, Ansible, Docker, Kubernetes Puppet, Nagios, Terraform.

Scripting: Bash and Shell Scripting

Version Control: Git and GitHub

IAC: Terraform

Languages: java

OS: Linux

EDUCATION

Bachelor Of Engineering: Computer Science
Nov 2020 - May 2024

- St Joseph Engineering College, Mangalore

Pre-University: PCMC
May 2018 - Jul 2020

- Sri Chaitanya PU College, Mangalore

10th std-SSLC
Apr 2017- May

CERTIFICATES

AWS SOLUTION ARCHITECT – ASSOCIATE

HASHICORP - TERRAFORM ASSOCIATE (003)

CLOUD QUEST - CLOUD PRACTITIONER (Badge)

CLOUD COMPUTING ARCHITECTURE

DEVOPS ENGINEER

PROJECTS

Mass Emailing using AWS | **Jun 2024 – Jul 2024**

- Developed a scalable, cost-efficient mass emailing platform using AWS Lambda and SES, with S3 integration for broader audience reach—drawing inspiration from industry solutions like MoonMail.
  - **Services used:** S3, Lambda, CloudWatch and SES.

Image Labels Generator using Amazon Rekonition | **Aug 2024 – Sep 2024**

- Implemented Amazon Rekognition to automatically detect and label objects, scenes, and activities in images, simplifying visual content categorization. Integrated with AWS Lambda, it enables seamless automation of large-scale image processing.
  - **Services used:** S3, Lambda, Amazon Rekonition and DynamoDB.

CloudBuildOps: Automating CI/CD and Deployment in a Scalable Cloud Environment. | **Oct 2024 – Nov 2024**

- CloudBuildOps automates CI/CD processes in a scalable cloud environment by integrating Jenkins for continuous integration, Maven for build automation, and Tomcat for application deployment. This streamlined pipeline enhances the efficiency, scalability, and reliability of delivering cloud-native applications.
  - **Tools used:** Jenkins, Maven, Tomcat and AWS.

VelocityOps: CI/CD Pipeline for Microservices Application on AWS | **Nov 2024 - Present**

- Built a CI/CD pipeline for a microservices application using Docker, Jenkins, Terraform, and Kubernetes on AWS. Automated infrastructure provisioning with Terraform and integrated Jenkins for seamless, scalable deployments in a cloud environment.
  - **Tools used:** Docker, Jenkins, Terraform, Kubernetes, Ansible and AWS.
