github.com/Yuvrajpk | https://yuvrajpk.github.io/Portfolio/

SUMMARY

Experienced DevOps Engineer with expertise in automating infrastructure, optimizing CI/CD pipelines, and fostering seamless collaboration between development and operations. Proficient in AWS, containerization (Docker, Kubernetes), and infrastructure-as-code (Terraform, Ansible and Cloud Formation).

Skilled Cloud Engineer with expertise in designing, deploying, and managing scalable and secure cloud infrastructure on AWS. Proficient in a wide range of AWS services (EC2, S3, Lambda, RDS). Adept at enhancing cloud scalability, security, and cost-efficiency while driving continuous improvements in software delivery processes.

SKILLS

Cloud Technologies:

- **Compute & Serverless:** Elastic Compute Cloud (EC2), AWS Lambda
- **Networking & Delivery:** Route 53, Virtual Private Cloud (VPC), CloudFront
- **Monitoring & Management:** CloudTrail, CloudWatch, AWS Auto Scaling
- **Storage & AI Services:** Simple Storage Service (S3), Amazon Rekognition
- **Automation & Orchestration:** CloudFormation

DevOps Tools:

- **Continuous Integration/Continuous Deployment (CI/CD):** Jenkins
- **Configuration Management:** Ansible, Puppet, Chef
- **Containerization & Orchestration:** Docker, Kubernetes
- **Monitoring & Logging:** Nagios

Databases: Relational Database Service (RDS), DynamoDB

Infrastructure as Code (IaC): Terraform

Scripting: Bash, Shell Scripting

Programming Languages: Java

Operating Systems: Linux

Version Control: GitHub

CERTIFICATES

AWS SOLUTION ARCHITECT – ASSOCIATE

HASHICORP - TERRAFORM ASSOCIATE (003)

CLOUD QUEST - CLOUD PRACTITIONER (Badge)

CLOUD COMPUTING ARCHITECTURE

DEVOPS ENGINEER

PROJECTS

Mass Emailing using AWS | **Jun 2024 – Jul 2024**

- Developed a scalable, cost-efficient mass emailing platform using AWS Lambda and SES, with S3 integration for broader audience reach—drawing inspiration from industry solutions like MoonMail.
  - **Services used:** S3, Lambda, CloudWatch and SES.

Image Labels Generator using Amazon Rekonition | **Aug 2024 – Sep 2024**

- Implemented Amazon Rekognition to automatically detect and label objects, scenes, and activities in images, simplifying visual content categorization. Integrated with AWS Lambda, it enables seamless automation of large-scale image processing.
  - **Services used:** S3, Lambda, Amazon Rekonition and DynamoDB.

CloudBuildOps: Automating CI/CD and Deployment in a Scalable Cloud Environment. | **Oct 2024 – Nov 2024**

- CloudBuildOps automates CI/CD processes in a scalable cloud environment by integrating Jenkins for continuous integration, Maven for build automation, and Tomcat for application deployment. This streamlined pipeline enhances the efficiency, scalability, and reliability of delivering cloud-native applications.
  - **Tools used:** Jenkins, Maven, Tomcat and AWS**.**

VelocityOps: CI/CD Pipeline for Microservices Application on AWS | **Nov 2024 - Present**

- Built a CI/CD pipeline for a microservices application using Docker, Jenkins, Terraform, and Kubernetes on AWS. Automated infrastructure provisioning with Terraform and integrated Jenkins for seamless, scalable deployments in a cloud environment.
  - **Tools used:** Docker, Jenkins, Terraform, Kubernetes, Ansible and AWS.

EDUCATION

Bachelor Of Engineering: Computer Science | **Nov 2020 - May 2024**
- St Joseph Engineering College, Mangalore

Pre-University: PCMC | **May 2018 - Jul 2020**
- Sri Chaitanya PU College, Mangalore

10th std-SSLC | **Apr 2017- May 2018**
- Kendriya Vidyalaya No. l, Mangalore
